	<p align="center">Effective Date: 13-February-2004</p>
<p align="center">1 INTRODUCTION</p> <p>The Division of Forensic Science (DFS) has implemented a Safety Program (the Program), as defined in this Manual, to provide a safe and healthy workplace for its employees, and also for contractors, volunteers, interns and other visitors to the Divisions' buildings. The Program:</p> <ul style="list-style-type: none"> • identifies the hazards to DFS employees in the workplace, • determines and implements appropriate preventive engineering controls to minimize/eliminate those hazards, • supplies necessary personal protective equipment (PPE) and develops administrative requirements for processes and practices which employees must follow to provide further protection from those hazards, and • provides backup responsive measures in the event of failure of the preventive and protective measures. <p>The Program also promotes a safety culture among DFS management and employees which allows for continual assessment and improvement of the existing Program.</p> <p align="right">◆End</p>
